

Anaconda Mining is in the process of closing its acquisition of Orex Exploration, which owns the Goldboro Project in Nova Scotia. In preparation for the closing and to be ready to advance the project when the transaction closes, the company is searching for a **Senior Project Manager** to lead the development of the Goldboro Project.

Position: Senior Project Manager

Location: Nova Scotia

Posting Date: April 10, 2017

Duration: Full-time, ongoing

Overview:

Reporting to the Vice President of Technical Services, the Senior Project Manager will be responsible for managing the overall engineering and planning initiatives for the Goldboro project, including commissioning, oversight and acting as the primary interface liaison for all necessary property project baseline studies, technical studies, socio-economic impact studies and environmental audits. The Senior Project Manager is also expected to ensure all work done is to standard and requirements, to fully permit and develop Goldboro Project into operating mine. The objective of this role is to:

- Lead the permitting, project planning and construction throughout the various project stages, providing leadership and guidance for all staff as well as providing support to the senior management team.
- Ensure contractors are made aware of their roles and responsibilities with regard to safe working procedures and comply with all company-wide safety sustainability policy and procedures.
- Manage the process of developing feasible solutions.
- Manage the engineering process for selected solutions in mine design at various stages.
- Manage the planning process for execution of the engineered solutions.

Primary Responsibilities:

- Leading the permitting and development of The Goldboro Project, representing Anaconda in Nova Scotia;
- Establish communication and consultation channels within the Guysborough County and Goldboro Community;
- Manage and develop, NI 43-101 bankable feasibility study for the Goldboro project;

- Lead and manage the operations projects with multiple project engineers and managers' procurement, EPCM, owner's team, and external construction management consultants;
- Manage all project functions related to project management, site management, project control, engineering management, procurement, construction management to meet the project goals;
- Manage and communicate projects group as needed on major projects in the region;
- Identify risks and ensure operational impacts are minimized;
- Monitor and conduct reviews of detailed mine designs and drawing specifications;
- Manage engineering progress against budget and forecasted schedule;
- Lead and manage and oversee engineering budget, project schedules and project control budgets;
- Responsible for producing all engineering management reports and providing on-going status of the project;
- Maintain effective and on-going communications with construction and contractor management teams;
- Manage and monitor project QA/QC and commissioning systems and documentation.
- Manage other project engineering duties as assigned;

Education and Experience:

- B.S. degree in Engineering, preferable in Mining or a combinations of the skills and experience;
- 15+ years of project management experience;
- 15+ years of mining experience in operations, engineering and project evaluation;
- Strong track record of successfully completed projects in the mining industry;
- Experience in underground mine design and development;
- Experience in capital project management of + \$100M;
- Familiar with mine planning software such as Surpac, AutoCAD or other mine development software;
- Strong knowledge of Community Safety and Sustainability Regulations;
- Strong knowledge of NI 43-101 and the ability to sign off on mineral reserves as a qualified person;

Core Competencies:

- Demonstrated commitment to safe sustainability working practices;
- Ability to effectively delegate while maintaining forward motion on key deliverables;
- Proven team player skills with ability to build and maintain internal and external relationships;
- Strong written and verbal communication skills, excellent business and technical writing;
- Strong organizational, interpersonal, problem solving and analytical skills;
- Ability to work independently with minimal supervision;

- Strong mentoring, training and coaching to junior colleagues.
- Comfortable and Capable of Leading Teams;
- Capable of Managing Cross Functional Teams and Multiple Projects;
- Capable of reading drawings and schematics;
- Proficient in Microsoft Office suite

About the Goldboro Deposit:

The Goldboro Gold Deposit, currently controlled by Orex Exploration Inc., is located on tidewater approximately 185 km northeast of Halifax, Nova Scotia. Following the completion of the Arrangement Agreement announced on March 3, 2017, Orex Exploration will become a wholly-owned subsidiary of Anaconda and Goldboro will become the third mineral project with current NI 43-101-compliant resources in the Company's resource portfolio, along with Viking and Point Rouse.

Safety, Integrity, Reliability.

Anaconda Mining Inc. is an equal opportunity employer.
